Comfort That's Patented[™]

COMFORT THAT'S PATENTED[™]

A Message From Rich Golden

Thirty-four years ago, my father, Robert Golden, Sr. and his friend, Fred Kiwak, had a shared vision to build the most advanced, comprehensive and comfortable power lift and reclining chairs ever created to serve the medical market. Included with their vision was a mission "To Build It Right the First Time," a commitment that still holds true today. This mission statement is prominently displayed throughout our 200,000 square-foot manufacturing facility in Old Forge, Pennsylvania, the largest lift chair manufacturing facility in the world.

They researched everything, soliciting information from industry experts in upholstery, chair design, sewing and advanced electronic technology. Once they realized that their vision could become a reality, they began building these chairs by hand in an old one-car garage/barn - working and reworking the mechanisms, the seating, the upholstery options, the sizes and all of the features of their chair until their vision came to life. The rest is history.

In 2008, expanding upon their vision, we began the process of entering the consumer market, offering our technologically-advanced seating system throughout furniture stores in North America. We thoroughly researched everything about the recliner market, soliciting information from industry experts in upholstery, chair design, sewing and advanced electronic technology.

In 2009, the brand UltraComfort™ America was officially launched, changing and setting new standards in the lift chair and recliner category. We were determined to enter this market with products that had superior functionality, innovative designs, multiple seating options, higher-end fabrics and unmatched American-made quality and craftsmanship.

In 2018, UltraComfort™ changed the face of the recliner industry by introducing our Eclipse technology, the only recliner with a patent-pending three-motor position system. Our Eclipse technology has revolutionized the meaning of personal comfort and multi-functional seating options in the recliner category, while still incorporating our unique lift system.

UltraComfort™ plans to continue to introduce new product innovations, solidifying our position as the premier seating solution company in the lift recliner category.

Stay tuned - in many ways, we are just getting started...

A handwritten signature in black ink, appearing to read "Rich Golden". The signature is fluid and cursive, written in a professional style.

COMFORT THAT'S RELIABLE

SUPERIOR SUPPORT

Hand-blown, high-density Dacron prevents body impressions and breakdown

MEDICAL GRADE CONSTRUCTION

Double-doweled, stapled, glued & corner blocked joints eliminate cracking & splitting

ENHANCED SEATING SYSTEM

49 pocketed coils deliver pressure responsive support

NO-SAG CONSTRUCTION

8-gauge sinuous wire springs allow for reinforced quality & support

STRONGEST IN THE INDUSTRY

Kiln-dried maple hardwood at all stress points provides added longevity

ADAPTABLE STABILITY

Adjustable, rubber coated leg levelers encourage a safer, non-skid lift experience

THE ONLY LIFETIME WARRANTY on wooden frames in the industry.

LIFETIME WARRANTY also offered on steel frame & scissor mechanisms.

CHAISE PAD constructed with one piece of extra-thick, high-density foam eliminates shifting & provides lasting comfort.

QUICK DISCONNECT HAND CONTROL makes for an easy & stress-free replacement experience.

PATENTED SMART TEK® DIAGNOSTIC SYSTEM communicates electrical health of the chair.

EXTRA LONG, 9-GAUGE STEEL SCISSOR MECHANISM provides a longer footboard extension to accommodate more sizes

DURABLE FABRICS withstand over 70,000 double rubs allowing for longer use with minimal wear & tear

40+ POINT INSPECTION process guarantees that each chair meets high quality standards

Upward motion of our lift position provides a smooth transition from seated to standing without dumping you out of the chair.

COMFORT THAT'S EXCLUSIVE

UltraComfort™ holds multiple patents on our technology, allowing us to offer an exclusive comfort experience.

PATENTED Stellar Positioning

- Unique Patented Positioning Provides Maximum Body Support
- Unlimited Positions Provide the Most Comfort Options
- Four-way Movement of the Seat Relaxes the Back by Disengaging the Psoas Muscles
- Movement of the Seat Eliminates the Gap Between the Seat and the Back

Up

TV

Zero Gravity

Trendelenburg

PATENTED AutoDrive® Hand Control

- Ergonomic Design for Easy Gripping
- Memory Capabilities for Customized Comfort
- Partial & Total Lock Options for Safety & Convenience

PATENTED SmartTek® Diagnostic System

Smart Tek® is a patented technology standard on all UltraComfort™ lift recliners. Smart Tek® uses three LED lights to signal when the chairs is not functioning.

COMFORT THAT'S EXCLUSIVE

PATENTED Eclipse Technology

The patented Eclipse Technology includes an extra motor that provides a tilting motion, which cradles your body and offers more positioning than any other recliner on the market.

Positioning options made possible by

TV with Eclipse*

Lounge

Lounge Reclined*

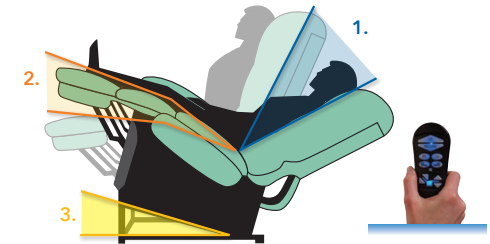

Rejuvenate

*Only available on Stellar Eclipse

Stellar Eclipse

Standard on the UC558 and UC570s

Motor #1

Adjusts back positioning.

Motor #2

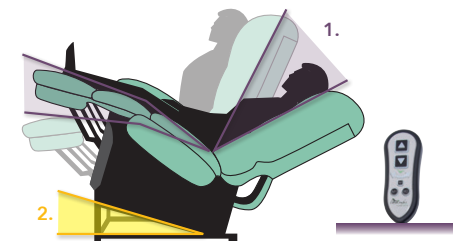

Controls the footrest movement and the patented movement of the rising seat box.

Motor #3

Activates Eclipse technology, a tilting movement that provides a weightless experience.

3-Position Eclipse

Standard on the UC546s

Motor #1

Controls the movement of both the backrest and footrest.

Motor #2

Activates Eclipse technology, a tilting movement that provides a weightless experience.

COMFORT THAT'S PLUSH & DURABLE

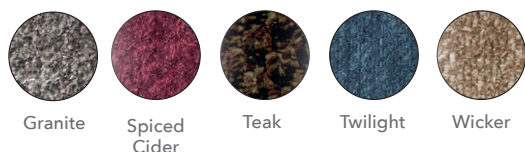

Our fabric selection allows you to experience a one-of-a-kind level of comfort that has luxurious feel, while maintaining a high standard of durability. Each collection has standard fabric patterns chosen with style and functionality in mind.

ULTRAPLUSH BRISA® - COMFORT THAT'S PLUSH & DURABLE

*Shown in UltraPlush
Coffee Bean*

ULTRAPLUSH BRISA® - COMFORT THAT'S PLUSH & DURABLE

Lifetime Warranty Against Cracking, Fading and Delamination

We've handcrafted a revolutionary innovation - the world's first BREATHABLE polyurethane fabric. Our distinguished Brisa® & Brisa® Distressed offerings feature a textured aesthetic in a wide range of colors. These unrivaled styles have broad performance appeal for seating.

Highlights include:

- Exceptional wear resistance (200K - 300K double rubs)
- Climate control technology that shields from temperature changes
- Endures alcohol-based cleaners and 1:5 bleach/water solution
- Plush, luxurious feel that enhances and encourages comfort

An intelligent solution - the Brisa® family of performance fabrics highlights boundary-pushing innovation where looks, feel and performance matter.

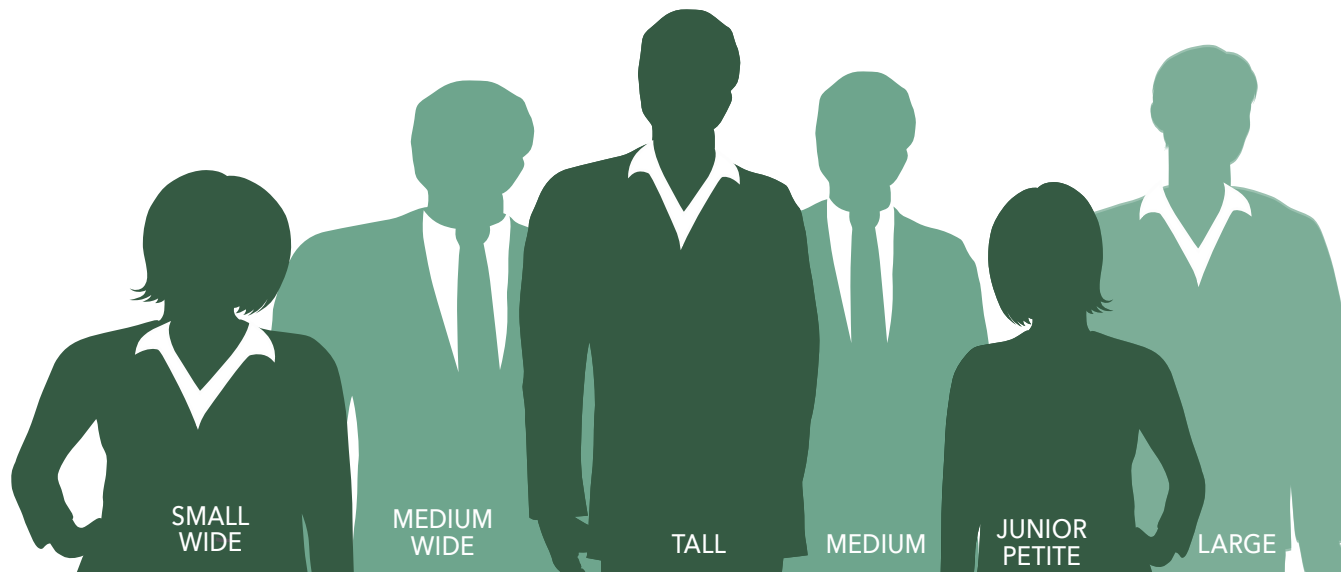

COMFORT THAT'S CUSTOMIZABLE

COMFORT THAT'S VERIFIED

UltraComfort's power lift recliners are handcrafted and inspected by American workers to ensure a high level of quality.

INSPECTION

- Chair is inspected for fabric cleanliness.
- Upholstery is inspected for direction of nap.
- Upholstery is inspected for seam integrity and holes.
- While seated, chair is inspected for the proper foam and fiber regulation, i.e., no bumps or uneven stuffing.
- Poly packs are inspected and no staples are touching the metal frame.
- Chair is inspected for broken, damaged or missing parts.
- Frame is inspected for split wood.
- Chair is inspected for loose staples.

VERIFICATION

- Sleep position is verified.
- Sit position is verified.
- TV position is verified.
- Model number is verified.
- Fabric color is verified.
- Options are verified (if applicable).
- Footboard gap verified as even and straight.
- Placement of five French tacks are verified.
- Proper law tags are located and verified.
- Washer placement and number of washers at motor clevis and straps are verified.

TESTING

- Transformer is plugged in and LED lights (Smart Tek®) are checked on transformer, hand control and the motor wire.
- Heat function is turned on and tested, when applicable.
- All massage buttons & massage zones are turned on and tested, when applicable.
- Hand control LED button lights are observed. Lights are dim when not in use and brighten when any button is pressed.
- Lift and Recline buttons are tested for functionality.
- Up and down arrow buttons for back and footrest are tested for functionality.
- Chair is ridden from fully reclined to full lifted, ensuring smooth & quiet movement.

FINISHING TOUCHES

- Proper owner's manual is added.
- Arm covers are added, when applicable.
- Appropriate hang tags are applied with swift tack gun.
- Model number, model options, serial number and sales order number are scanned from work order and box tag.
- Motor serial number is scanned.
- Transformer serial number is scanned.
- If chair passes inspection, it is sent to boxing with the box labels.
- Any loose threads are trimmed.
- Serial number labels are attached to the lift frame and hand control cord.
- Motor clevis pins are locked.
- All wires are wrapped and fastened with tie wraps.
- Lift frame bolts are securely fastened to bottom arms.
- All frame bolts are tightened.
- All scissors mechanism bolts are present and tight.
- Leg levelers are checked and tightened.
